

I e-IEP

The Drishti e-IEP, is an offering from our web based therapy creation and management system. The Drishti e-IEP is in use since the past decade with 2,000 therapy plans having been successfully delivered across Drishti centres, partner schools and in home environments.

At its core is a very robust and well refined resource base of goals for every area of import in remedial education covering ages 2-18. The resources for the Drishti e-IEP have evolved over two decades of dedicated involvement from subject matter expert reviews and constant validation with school performance.

I KEY BENEFITS

- YOU DO NOT NEED TO PERSONALLY CREATE TOP QUALITY PLANS; the highly reliable and proven resource base ensures quality therapy plans for all.
- CONVENIENCE OF WEB-BASED, ANYWHERE ACCESS; both therapist and administrator can access ongoing plans from any device.
- SCREENER TO PLAN; extensive validation of the system means that, in most cases, there is no need to undertake lengthy assessments in order to arrive at a reliable therapy plan. Instead, easy to use Drishti screeners completed by school teachers are sufficient.
- EASE OF MONITORING PROGRESS; school administration can not only view all the details of each plan but also view real time progress (as updated by therapist) of each/any plan.
- EXPERT DRISHTI MENTOR SUPPORT; qualified therapists at Drishti, who have years of experience across areas of needs, will use the web based system to provide prompt email/phone support.
